

DAILY DRILLING REPORT - Well X12

Report Date: 2022-12-10 | Current Depth: 3845 m MD

Formation: F3 (Base transition)

Operations Summary:

At 3845 m MD during rotary drilling, significant mud loss encountered. Loss rate ~25 bbl/hr with total lost c

Root Cause: Natural fracture network encountered at transition into F3 base.

Mitigation: Pumped 50-bbl mixed coarse/medium LCM pill. Lowered flow rate to 1400 lpm to reduce downh
